documentation and certificates

Bullet Crusher BC-2 Army

BC-2 is made of the steel SSAB HARDOX and is able to repeatedly defragment and halt all kinds of ammunition, hard steel core ammo included (.308 AP). In spite of compact size captures even “anti-materials” ammunition of cal. 12.7 (.50 BMG)- bullets with the energy of **17 000 Joule**.

Dimensions:

21 x 32 x 30 cm

Weight: up to 13 kg

Muzzle opening: ca. 6.8 cm

Warranty: 5 years if conditions are met

NATO: NSN 1095-16-008-5453

Bullet Crusher BC-1

BC-1 Bullet trap is designed for the safe discharge of the weapon. The device is able to capture all kinds of commonly used ammunition by NATO armies. Unique construction and the design of the device. Despite its compact size it can safely halt and fragment all calibers of guns and rifles from .22 LR to .338 LM, including .308 Win AP (with core steel), up to **11 000 Joules!**

Dimensions:

25 x16 x 25 cm

Weight: up to 10 kg

Table, Wall mounting etc.

Warranty: 24 months

Bullet Crusher BC1-Tactical

The BC-1 Tactical is designed for safe discharge of the weapon without the need to remove additional equipment such as light, laser etc. The input diameter of the discharge device is 100mm. It can, like the BC-1, disarm and stop almost all types of ammunition. The design of the device is so sophisticated and durable that despite its compact size it can safely fragment all calibers from .22 LR to .338 LM, including .308 Win AP (core steel), up to a maximum impact energy of **11,000 Joules**.

Dimensions:

25 x 18 x 27

Weight: up to 14 kg

Table, Wall mounting etc.

Warranty: 24 months

Bullet Crusher BC1-P

BC-1 /P - for pistol calibers only! This small and portable device is determined mostly for civil market, shops, safe rooms and shelters. The device is able to defragment and halt all kinds of pistol ammunition. The construction of the equipment is sophisticated and resistant that in spite of the compact size is enable secure capture... up to 2 000 Joules!

Dimensions:

25 x 16 x 25

Weight: up to 10 kg

Table, Wall mounting etc.:

Warranty: 24 months

Mobile test range BC7-GM

A portable shooting range is designed for gunsmiths and gun manufacturers. This revolutionary facility brings a new level of convenience and flexibility to shooting and gun testing.

You no longer have to travel to the range with a repaired or manufactured firearm. The portable shooting range is designed to be easily portable and quickly adjustable to different environments and conditions. It is equipped with a post-fire exhaust extraction system. Simply attach the vent to the 100mm flange.

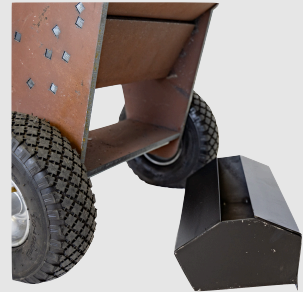

For gunsmiths, this portable range is the ideal tool for testing and tuning guns.

Gun manufacturers will benefit from the portable range when testing and developing new models. You can quickly and efficiently conduct various experiments and recordings to optimize the performance and functionality of your weapons. A portable shooting range gives you the instant and quick feedback that will help you to bring even better guns to market.

A portable shooting range for gunsmiths and gun manufacturers is truly a must-have device for anyone involved in shooting and gun manufacturing. It brings freedom and options that have never been available before.

The portable shooting range is tested and certified by an international testing facility. The individual parts can be replaced very easily and in case of damage to any part they can be replaced.
